

Year 4 Home Learning Autumn Term 2

Where in the world

Choose **one** task to complete each week and have your book back in class by Wednesday. We will share our learning on Thursday afternoons.

Have fun!

<p>Choose a country from anywhere in the world and research it. Can you create a colourful poster or a fact file with pictures and fact boxes.</p>	<p>Create your own PE game to share with the class. Will it need any equipment? Remember to include rules and instructions.</p>
<p>My project: Is there something you are really interested in? Then why not share it with the class - you could draw a picture, create a poster, quiz or write a report.</p>	<p>Electricity Hunt: draw a plan of your house in your book and label it with where in the home you have electricity.</p> <div style="text-align: center;"> </div>
<p>In DT we are learning about ingredients for bread. Can you make something at home and share a description of it and what it tasted like and send a picture (email me if needed).</p>	<p>Research and create a poster about climate change and renewable energies as part of our electricity lessons in science. How is the world using the weather to help generate electricity?</p> <div style="text-align: right;"> </div>
<p>French: Using the French we have learned can you tell me about your family, perhaps draw a family portrait to help, you can tell me their age and where you live.</p>	

Spellings will be on Thursday mornings.

Keep up with your times table rockstars - let me know if you need your login.
