

Year 4 Home Learning Spring Term 2

Settlements

Choose **one** task to complete each week and have your book back in class by Thursday. We will share our learning on Thursday/Friday afternoons.

Have fun!

 <p>Create a mini habitat for the bugs in your outside space at home. This could be using recycled materials to build a bug hotel or using materials you can find outdoors.</p>	<p>Practise your times tables daily - can you challenge someone at home to see who can get the best score. </p> <p>Spelling test will be on Thursday. Please practise the spellings listed for that week.</p> 	<p>Think about Amble as a settlement. What features does Amble have that makes it an ideal settlement for you and everyone else who lives there. Create a plan of Amble as a settlement.</p> <p>Are there areas that we cannot live without? What else might you add to Amble to make it an even better settlement?</p>
<p>Design and make a poster about anything you like. Can you add any moving parts? Flaps that open, parts that turn or spin. Try making your poster 3D.</p>	<p>Write a short story about something that has happened at home. Write no more than 100 words but must have a beginning, middle and ending.</p> 	
<p>Listen to some of your favourite music at home. How does it make you feel? Do different parts of the music make you feel different things? How do other people in your house feel when you listen to it? Write a report to answer these questions and other questions you can think of.</p>		<p>Research a minibeast (bug). Include a labelled diagram and some written details to share with the class.</p> 
<p>Draw a pencil case that you would love to have. It can have any design on it. Label the pencil case contents (pencil, rubber...) in French.</p>
